PS1 Single Weapon Safe.

The body is made from 6mm steel plate, pressed formed. All joints formed are continuously welded. The door is recessed 10mm to maximise resistance to jemmy bar attack. The door has no more than 1.5mm gap. The lock is a 6 lever Ross 600 series. There are four holes in the back and base to secure the safe. There is a padded false floor to protect the weapon should anchoring bolts be used in the base.

PS2 Key

The pressed steel body is 6mm thick. Door 10mm thick swings on concealed hinges. There are 4 holes in the back and base for anchoring.

External Dimensions: 245mm H x 280mm W x 300mm D @ 24kg.

Designed to securely store 4 hand guns. There is one padded, removable shelf, and one padded false floor. Locking is via a 6 lever, pick resistant Ross 600 Series, protected by a drill resistant hard plate. The door is deadlocked when closed via dog bar.

The door is recessed 10mm to maximise resistance to jemmy bar attack.

PS3 Key

The body is from 8mm steel plate pressed formed with all joints continuously welded. The 10mm thick door is recessed 10mm and swings on alloy steel concealed hinge pins. The door is dead locked when locked via dog bar.

External Dimensions: 260mm H x 350mm W x 300mm D @ 33kg.

Designed to secure 6 hand guns. There is one removable padded shelf, and false floor.

PS1-2T

Each safe chamber is secured with a Ross 600 Series lock. The chamber base has a protective padding. The door is dead locked via a full length dog bar.

Locks are keyed to differ. Master keying is optional.

External Dimensions: 325mm H x 300mm W x 200mm D @ 25kg.

PS1-4T

This four chamber module is designed for use where multiple users are required to secure pistols individually. Locks are keyed to differ. Master keying is optional.

External Dimensions: 630mm H x 300mm W x 200mm D @ 50kg.

Each chamber made to PS Specifications.

Dimensions: All dimensions in millimeters.

Lock Options: Key, Combination or Digital for all safes.
