www.ardelsafes.com.au

Model 1. Three Rifle Safe.

This model conforms to Level 2 Category C & D. Body is from 3mm steel pressed formed and welded. The door is from 6mm steel plate. There are four x 14mm diameter holes in the base, two in the back to secure the safe.

There is a 200mm high, lockable Ammo chamber in the upper section of the safe.

There is 1300mm clearance below the ammo chamber. Rifles are supported with a grooved wooden rack. There is a padded false floor.

External Dimensions: 1500mm H x 360mm W x 300mm D. There is a full length dog bar welded to the inside of the door hinge side to deadlock the door when locked.

Three point locking is via 10mm diameter steel locking bars, which engage the rebate top, centre and bottom of the door. Combination and digital locking optional.

Model 2. Six Rifle Safe.

Made to Level 2, Category C & D specifications. Body from 3mm plate, door from 6mm steel plate. There is a 200mm high, lockable Ammo chamber in the upper section of the safe.

There is 1300mm clearance below the ammo chamber. Rifles are supported with a grooved wooden rack. There is a padded false floor.

External Dimensions: 1500mm H x 510mm W x 300mm D. There is a full length dog bar welded to the inside of the door hinge side to deadlock the door when locked.

Three point locking is via 10mm diameter steel locking bars, which engage the rebate top, centre and bottom of the door. Combination and digital locking optional.

Internal shelf model shown.

Model 3. Category H Rifle Safe.

Constructed fully from 6mm plate. The door has multi point locking. There are 6 retractable 20mm diameter solid stainless steel bolts.

External Dimensions: 1500mm H x 600mm W x 300mm D.

Mass: 160kg. 10 rifle capacity.

There is an internal 200mm high lockable chamber in the upper section of the safe, leaving 1300mm headroom for rifle storage. Alternatively, a shelf may be fitted in place of lockable chamber.

Twelve point locking. Multi point Retractable bolt work. There are four holes in the base and back to facilitate securing if required. Bolting is not necessary over 150kg net weight. Lock options are key, combination or digital. Model shown has a shelf.

Dimensions: All dimensions in millimeters.

Lock Options: Key, Combination or Digital for all safes.
